

Name: _____

- 1) Set up **tcpwrappers** to deny ALL services to ALL systems and to allow ALL services to localhost. Explain how you tested that this worked.

/5

- 2) Install **pidentd** from <http://www.tripwire.com> . Why should this package be installed? Show your instructor.

/5

- 3) What are the last three lines in the **/var/log/messages** file? Use **grep** to find ant denied messages in the file and list them.

/5

- 4) Read pages 305 – 318 of the text. Install configure tripwire from the RPM file. Now, with tripwire running create a new user and show your instructor the tripwire output that indicates changes to the **passwd** and **shadow** files on your system.
